DECLARATION

We affirm that the project work titled “**AYUSH Startup Registration Portal**” being submitted in partial fulfillment for the award of the degree of **Bachelor of Technology in Computer Science and Business Systems** is the record of original work done by us under the guidance of **Mrs. Divya S, Associate Professor, Department of Computer Science and Business Systems**. It has not formed a part of any other project work(s) submitted for the award of any degree or diploma, either in this or any other University.

BARATH M
(7376222CB108)

KANISH J
(7376222CB120)

VIJAYA RAJA K M
(7376222CB160)

I certify that the declaration made above by the candidates is true.

Mrs. DIVYA S

ACKNOWLEDGEMENT

We would like to enunciate heartfelt thanks to our esteemed Chairman **Dr. S.V. Balasubramaniam**, and the respected Principal **Dr. C. Palanisamy** for providing excellent facilities and support during the course of study in this institute.

We are grateful to **Dr. Venkatesan R, Head of the Department, Department of Computer Science and Business Systems** for his valuable suggestions to carry out the project work successfully.

We wish to express our sincere thanks to **Mrs. Divya S, Associate Professor, Department of Computer Science and Business Systems**, for her constructive ideas, inspirations, encouragement, excellent guidance, and much needed technical support extended to complete our project work.

We would like to thank our friends, faculty and non-teaching staff who have directly and indirectly contributed to the success of this project.

BARATH M (7376222CB108)

KANISH J (7376222CB120)

VIJAYARAJA K M (7376222CB160)

ABSTRACT

The rapid growth of India's AYUSH sector encompassing Ayurveda, Yoga and Naturopathy, Unani, Siddha, and Homeopathy has created an urgent need for a transparent, standardized, and digitally-enabled licensing and governance ecosystem. Traditional paper-based registration processes are plagued by bureaucratic delays, lack of real-time visibility, and inefficient distribution of government welfare schemes and loan programs to eligible AYUSH startups. This project presents the AYUSH Registration Portal, a comprehensive, secure, and automated four-portal MERN stack web application designed to digitize the complete lifecycle of AYUSH startup licensing, officer verification, product commerce, and administrative oversight. The platform comprises four interconnected portals: the Startup Registration Portal, where AYUSH startups register their business, apply for licenses, track application status, manage product inventory, view certifications, and apply for government loans; the Officer Portal, where designated government officers review applications, conduct site inspections, approve or reject startups, issue digital certificates, and manage loan schemes; the Customer Portal, which functions as a B2C e-commerce marketplace listing verified AYUSH products from approved startups for public purchase; and the Admin Portal, which provides superuser-level oversight across all portals including user management, application monitoring, system security, and activity logging. This project aims to revolutionize the way AYUSH startups interact with government licensing authorities by replacing fragmented manual workflows with a unified, role-aware digital ecosystem. We envision a structured platform that acts as a trusted digital authority for AYUSH startup verification, certificate issuance, and welfare scheme eligibility validation eliminating middleman interference, reducing processing delays, and creating a more accountable system for both AYUSH entrepreneurs and government officers.
